

**Sketch the graph of the function and complete the table.**

1.  $y = 3x + 2$

2.  $y = -\frac{3}{5}x + 1$

3.  $y = -2x - 6$

4.  $y = \frac{1}{3}x - 9$

5.  $y = -x + 3$

6.  $y = \frac{4}{3}x - 6$

7.  $2x + 3y = 15$

8.  $y - 3 = -2(x + 1)$

9.  $y - 10 = -3(x + 4)$

10.  $5x - 10y = 60$
